PROFESSIONAL SUMMARY

Computer Science student at the Lebanese International University with hands-on experience in networking, cybersecurity, and full-stack web development. Holds CCNA (1–4), Linux Essentials, and Cybersecurity certifications. Eager to contribute to a forward-thinking team as a junior IT, networking, or web development professional.

EDUCATION

Lebanese International University (LIU) - B.S. in Computer Science Sidon, Lebanon | In Progress

Amgad Institute - Professional Certifications

Graduated

CCNA 1, 2, 3 & 4 • Linux Essentials • Cybersecurity • Introduction to IoT

EXPERIENCE

Software Technician -CLICKONCE Lebanon | Oct 2025 – Present

- Diagnosed and resolved hardware and software issues across a portfolio of 5–20 client devices, reducing recurring faults through root-cause analysis and preventive maintenance.
- Installed, configured, and deployed operating systems (Windows, Linux) and enterprise software, ensuring smooth onboarding and minimal client downtime.
- Set up and troubleshoot local area networks, routers, and internet connectivity issues, applying CCNA-level knowledge to deliver reliable network performance.
- Assembled, upgraded, and repaired desktop and laptop hardware including storage, RAM, and peripheral components, extending device lifespan for clients.
- Trained clients on software usage and IT best practices, translating complex technical concepts into clear, accessible guidance to improve self-sufficiency.

TECHNICAL SKILLS

Networking & Infrastructure: TCP/IP, Ethernet, Subnetting, IPv6, VLANs, Firewalls, Routing & Switching, Packet Tracer

Cybersecurity: Access Control, Threat Detection, Security Policies, Endpoint Protection (Symantec), Cloud & Wireless Security, Information Privacy

Programming & Web Development: Java, C#, Laravel, React, Node.js, REST APIs

Operating Systems & Tools: Linux Server Administration, Windows Server, IoT Fundamentals, System Troubleshooting

PROJECTS

E-Commerce Web Application — Sweets Store

Laravel • React • Node.js

- Designed and developed a full-stack e-commerce platform for a sweets retailer, enabling online product browsing, ordering, and management.
- Built a dynamic, responsive front-end using React and a robust back-end REST API with Laravel, integrating both layers seamlessly.
- Implemented user authentication, product catalog management, and an admin dashboard to streamline store operations.

Network Simulation & Troubleshooting Lab

Cisco Packet Tracer • CCNA

- Designed and simulated enterprise-grade network topologies using Cisco Packet Tracer, applying CCNA concepts including subnetting, VLANs, and routing protocols.
- Configured and tested firewall rules, access control lists (ACLs), and switchover scenarios to demonstrate network resilience and security best practices.
- Documented network diagrams and troubleshooting procedures, strengthening systematic problem-solving and technical communication skills.

LANGUAGES

Arabic (Native) | **English** (Professional Working Proficiency)
